

# Codonics Virtua CD-R Premium Print-Surface Media

## **CD-R Premium Print-Surface Media**

Virtua™ CD-R Premium Print-Surface Media is a high quality recordable disc with a water and smudge-resistant printable surface. It provides a powerful advantage of fast-drying printing that won't wash away or smear. Virtua CD-R Premium Print-Surface Media utilizes a completely sealed inner and outer edge that virtually eliminates oxidation, thus preserving data far longer than budget-priced, lower quality media. Discs are optimized and tested for use with the Codonics Virtua Medical Disc Publisher. Only approved/recommended sources of Virtua CD-R Media should be used with the Virtua Medical Disc Publisher to insure correct data, and labeling integrity.

## **Storage**

Avoid using or storing the discs in an environment with high temperature or humidity. This may cause ink to transfer resulting in smudges or discs sticking to each other.

- ◆ Storage: 10 to 70°C; 3 to 95% RH non-condensing.
- ◆ Recommended Storage: 23°C; 50% RH.
- ◆ Avoid exposure to direct sunlight or strong light.
- ◆ It is recommended that the discs remain sealed in disc holders until used. This will protect the unrecorded discs from damage.

## **Disc Handling**

- ◆ Protect the recording surface of the discs from scratches, fingerprints, dust and smears.
- ◆ Hold the discs along the outer edges or center hole.

- ◆ Never touch the recording surface, printed label surface, or place it face-down on hard surface.
- ◆ Clean dirty discs with soft, dry cloth. Commercially available disc cleaner or ethyl alcohol may also be used.

**CAUTION!** Do not use gasoline, kerosene, lacquer-thinner, benzene, anti-static agents or LP record cleaners as it may damage the recording surface of the disc.

## **Disc Holder**

Once opened, protect the discs by storing them in the covered disc holder.

**CAUTION!** Make sure the clear disc at the top of the roll is removed.

## **Loading Virtua**

**CAUTION!** Make sure the Codonics Virtua Medical Disc Publisher is not recording/printing a disc.

1. Open the cover to access input bins.

2. Gently loosen the discs prior to placing them in the disc bins. This will help reduce discs sticking together.

- Insert discs in the input bin. Each input bin holds a maximum of 50 discs.

- Close the Cover.

### **Printing/Usage**

- Printed discs should be allowed to dry after printing.
- If labeling manually, write only on the label (white) side using a soft, felt tip marker.

**IMPORTANT!** Never use a ballpoint pen or hard tipped writing instrument.

### **Recording/Printing**

After recording/labeling, individual discs should be stored in Tyvek Sleeves or jewel cases for best results.

**IMPORTANT!** Do not place a wet disc in a Tyvek Sleeve. This could damage the recorded data or labeling on the disc.

### **Cleaning**

- For best ongoing performance, clean the Virtua discharge ramp with distilled water using a lint-free cloth once every couple weeks or as needed. Let air dry for five minutes before using Virtua.

### **Ordering Information**

<b>Catalog Number</b>	<b>Item</b>	<b>Quantity</b>
1VCA-RC933	Codonics Virtua CD-R Premium Media	300 CDs
V-SLEEVES	Codonics Virtua Tyvek Sleeves	1000 Sleeves
